

Component capability list

Within the scope of the Component Capability List, the following abbreviations and definitions shall apply:

Abbreviation:

CMS – Component Maintenance Shop
BMS – Base Maintenance Shop
SRS – Structure Repair Shop
WBS – Wheels and Brake Shop
IRS – Interior Repair Shop
WWSC - Water and Waste System Components Shop
DME - Domodedovo Airport
OVB - Tolmachevo Airport
MRV - Mineralnye Vody Airport

Definitions:

“Overhaul” – component maintenance up to and include high schedule maintenance level that stated in the applicable / vendor’s maintenance data. Inspection, testing, trouble shooting, defect rectification, component replacement, repair and modifications are included in to the “Overhaul”.

“Inspection /Test” – component maintenance up to and excluding high schedule maintenance level that stated in the applicable / vendor’s maintenance data. Trouble shooting, defect rectification, component replacement, repair and modifications are included in to the “Inspection /Test”.

“Modification” - alteration of an item to conform to an applicable / vendor’s maintenance data

“Repair” - rectification of defect(s) using an applicable / vendor’s maintenance data. Inspection, testing, component replacement and modification are included in to the “Repair”.

“Level II” - component maintenance up to and include high schedule maintenance level that stated in the applicable / vendor’s maintenance data. Inspection, testing, trouble shooting, simple defect rectification and line-replaceable unit (LRU) replacement are included in to the “Level II”.
